# Greatest Common Divisor

The **Greatest Common Divisor (GCD)** is the largest number which divides evenly by given numbers.

# Greatest Common Divisor

The **Greatest Common Divisor (GCD)** is the largest number which divides evenly by given numbers.

How to find the GCD:

First list the divisors of the given numbers then find the largest number by which both numbers are divisible.

# Greatest Common Divisor

The **Greatest Common Divisor (GCD)** is the largest number which divides evenly by given numbers.

How to find the GCD:

First list the divisors of the given numbers then find the largest number by which both numbers are divisible.

For example: find the GCD of 28 and 42.

Factors of 28            Factors of 42
